Error Log Entry

Name: Youdis Acharya
Credit Name: Object Oriented Programming 2
Assignment name: UEmployee, Faculty, Staff

What error message did you encounter (if any)?
No error message
What unexpected behavior did your program exhibit?
When testing the individual methods the getName method outputs the objects salary instead of name
What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)
In the UEmployee super class the getName method was returning the salary variable of the object
Include a screenshot of specific lines of code.

```java
public double getName()
{
    return(salary);
}
```

How did you fix the issue?
 I changed the return(salary) to return(employeeName) and edited the method to make sure it excepted returning a string.

```java
public String getName()
{
    return(employeeName);
}
```
